История создания JSTOR

- JOURNAL STORAGE
- Создан в 1995 г. по инициативе господина William G.Bowen
- Основная цель – создание надежных цифровых архивов для научных исследований

Представление журналов

- Все журналы в коллекциях JSTOR представлены с первого номера первого выпуска
- Текущие номера в большинстве случаев отсутствуют
- Для каждого журнала присутствует Moving Wall – интервал времени между самым свежим опубликованным номером журнала и номерами, доступными в JSTOR (в основном от 3 до 5 лет)

Архивные пакеты журналов

- Ценность не меньше, чем текущие коллекции (особенно в области медицины, химии, экономики и лингвистики)

Плюсы покупки архивных коллекций

- Простота и быстрота поиска
- Не столь известная информация, но не менее ценная
- Информация о которой не знали, но она нужна
- Возможность переместить бумажные номера в хранилища вне основного кампуса
- Шанс порадовать пользователей и предвосхитить их ожидания
- Высоко качественная услуга библиотеки!

0.159	- 0.128 (i.e., storm increasing).

Rain, therefore, is shown to aid in determining the velocity, direction, and development of our storms, as has already been inferred.

Thus far in regard to the motion of the storm

tions here shown has already been discussed. It should be added, that the unexpected approach to equality in the wind's strength on the right and left (south and north) sides of the storm is probably in large part due to the wind on the north coming but little retarded from the sea, while that on the south has lost much of its proper velocity by blowing long over land; so that, while the winds should theoretically show a less velocity on the left than on the right side of the track when the storm moves over a uniform surface, this inequality might be largely
